CONTROL COMPUTER TABLET PC OR LAPTOP

Through the computer, we can visualize as a point on a map spelling the exact location that is our dog.

The computer control has many more applications, and can be used for personal use, incorporating GPS navigation, TDT.

REPEATER COLLARS

The repeater collar help increase the distance between the radio collar and computer. The system has the advantage that for every increase repeater we use that put our > 100 km radius of action, always in line of sight. It is a device designed to put into the car to leave without installation or fixed at any point or strategic point higher.

GPS COLLAR / RF

The device collar, is responsible for transmitting the exact position through via radio signals to our repeater. Each of the collars we can visualize on the map of the computer with the name of the dog.

CHARGER COLLAR AND REPEATERS

The battery charger, will help us have always fully loaded all elements of our system, as they all lead a built-Lithium-Ion battery of high capacity. This charger is self-wise, because we are led by an alert when the battery has reached its maximum load at the same time cutting the burden of this for not damaging them.
